

Rectangular Utility Table with Diamond Pattern

\$611.⁰⁰

Product Description

This Rectangular Utility Table with Diamond Pattern has a wide variety of uses and comes in an appealing selection of colors to choose from thanks to the tough thermoplastic coating applied to the surface. This finish is available in both Standard and Extreme, preventing it from scratching, chipping or cracking and ensuring that the table stays looking fantastic for years and years. The Rectangular Utility Table with Diamond Pattern doesn't come with any chairs or bench attachments as it's designed to be multifunctional in 4ft, 6ft or 8ft sizes. It can be lifted into place and used indoors or outdoors, and can withstand a lot of weight and movement without it rocking or tipping over. It can be placed on grass, concrete or rubber and the sturdy design means it won't move around even when used by lots of people at the same time. If you have your own chairs you can place them around it, and the height is also perfect for wheelchair access. The table can be used for showcasing artwork, used by a vendor for a small business, or even function as a place to check in for events.
