

Rectangular Utility Table with Perforated Steel

\$782.⁰⁰

Product Description

The Rectangular Utility Table with Perforated Steel can be designed to fit your unique requirements. It comes in a selection of sizes including 4ft, 6ft and 8ft, and you can also opt for a Standard finish in 8 colors or an Extreme finish in 13 colors. The thermoplastic coating that covers the tabletop doesn't trap dirt, dust or debris so it is very easy to maintain with just a wipe of a damp cloth. It also prevents chipping and cracking, as well as providing a smooth and clean surface whether it's being used for eating, socializing or school work. The surface won't need to be repainted as with wood and metal tables, and the coating is soft to the touch which is much better than a cold metallic touch and look. It can be placed anywhere easily and can be lifted by two people by grabbing either side. The Rectangular Utility Table with Perforated Steel is lightweight but also strong and sturdy so it won't move in heavy winds or be tipped easily. Wheelchair users can roll straight underneath it and you can add multiple chairs for people to sit down.
