

Rectangular Single Pedestal Picnic Table with Perforated Steel

\$1,785.⁰⁰

Product Description

The Rectangular Single Pedestal Picnic Table with Perforated Steel is 6ft in length and this modern design can be used in two ways: cemented into the ground or attached directly onto concrete by bolting down the surface plate. The floating design of this table is a popular choice for easy access on all sides for kids, adults and wheelchair users too as they can position themselves under the overhang for sufficient leg room. The perforated steel surface allows rain to run straight through it so it's not sat on the table causing rust or corrosion. There's minimal assembly required with the Rectangular Single Pedestal Picnic Table with Perforated Steel and once it's installed there's no maintenance required such as repainting. As the surface has a thermoplastic coating, it's also highly resistant to scratching and staining so it stays looking great for many years. Graffiti and other paint-based solutions won't stick to the table and anything can be wiped easily from the surface with a damp cloth.
