

Meets National Standards for: ✓ ASTM F1487-17 ✓ CPSC Guidelines #325

Product Description

The Dog A-Frame Agility Ramp is the perfect addition to any agility course and takes training to the next level. It helps improve a dog's athletic ability, stamina, and communication with their handler. Owners can use treats or toys to encourage their dogs to climb up and come back down. The structure stands on sturdy metal posts that can be buried under the ground to prevent them from shaking during use. There's also Bone-shaped detailing on both sides so that dogs can resonate with the structure more deeply. The design also has safety details. Its perforated pattern provides traction to the dogs' paws needed for climbing any inclined surface. Even when it rains the holes allow water to drain quickly, so your dog can stay steady on their paws without slipping down. Speaking of rain, the entire Dog A-Frame Agility Ramp is covered in powder coating which prevents rusting and discoloration. You can choose either Neptune Blue or Dark Green color for the coat.
