

**Product Description**

Every dog needs constant entertainment and engagement to stay happy. This Dog Climb is designed to provide just that because a happy dog means a happy owner! It's an easy-to-climb structure that promotes agility training among dogs. The structure connects two ramps, forming the highest point. Your furry friends can climb up from one side and zoom back from the other without ever feeling bored of it. It's never-ending fun! This Dog Climb is also thoughtfully designed with safety in mind, so the ramps have raised notches to eliminate the risk of slips and falls. The best part about this Dog Climb is that it can support any breed of dog. Thanks to the 3x3 galvanized steel tubing support beams, the structure can withstand heavy weight without any problems. At the top lies a large bone decal that motivates the dogs to perform better, with each climb being faster than the last.
