

Meets National Standards for: ✓ ASTM F1487-17 ✓ CPSC Guidelines #325

Product Description

Who says fitness has to be confined to four walls? The Accessible Double Station Chest Press brings strength workouts outdoors. The station features two chest presses, one on each side. But unlike regular gym equipment, the Accessible Chest Press skips the bulky bench on one side. Why? To keep it accessible for wheelchair users, who can just roll up and start building those pectoral muscles. Everyone deserves to stay strong, and this setup makes that a reality. Both sides offer the same muscle-toning experience as the bars share the same size and height. The entire body of Accessible Double Station Chest Press is made from heavy-duty, long-lasting materials. This also means the station can support the weight and action on both sides without breaking a sweat. To protect the station from rust and other weather-related damages, the station is colored in a powder-coated finish. The station firmly stands on the ground without tilting to any side over time.

Product Specifications

Price: \$2,938.⁰⁰

Model Number: PAF002

Age Range: 13 years +

Unit Size: 2' 7" x 5' 1"
