

Meets National Standards for: ✓ ASTM F1487-17 ✓ CPSC Guidelines #325

Product Description

Want kids to be fearless of heights in their life later on? The Double Pole Climber is the ticket for that. It has two poles so two young climbers can train on it in a playful manner at the same time. Two poles also mean the climber is fit for a friendly competition. Kids can also use it solo by climbing one pole and descending from the other. Aside from overcoming the fear of heights, the Double Pole Climber is also a workout in disguise. Kids will be training important muscle groups and skills without even realizing it. Both the poles are made sturdy and with anti-slip material so the little climbers can focus solely on their climb. Parents will also have peace of mind, and playground designers will also rest easy knowing the climber is built to last. The material used in construction is commercial grade steel which is known for its firmness and durability. This is further improved by the powder-coated paint, which protects the pole from rust.

Product Specifications

Price: \$932.⁰⁰

Model Number: PGC007

Age Range: 5-12 years

Child Capacity: 1-3

Fall Height: 102"

Product Type: Kids Gym

Safety Zone: 16' 1" x 20' 5"
