

Meets National Standards for: ✓ ASTM F1487-17 ✓ CPSC Guidelines #325

Product Description

The Single Rope Climber is an important step towards making your playground an obstacle course, good for building skills and strengths that'll help kids in the long run. The structure has an 8 feet long rope suspended from a bar and anchored firmly into the ground. This keeps the rope steady and reduces any chance of excessive swinging, which can intimidate children from attempting it. Kids can focus on the fun and the challenge knowing the rope is stable. And while the 8 feet climb may seem daunting, it's still doable. The material of the rope provides enough friction for both hands and feet to complement the efforts of the kids. Climbing the Single Rope Climber isn't just a fun challenge. It has real physical and cognitive benefits. Kids will be building strength in multiple muscle groups. With every inch they climb, they'll be improving their core stability and grip strength. These improvements will help them in all kinds of sports and physical activities.

Product Specifications

Price: \$720.⁰⁰

Model Number: PGC009

Age Range: 5-12 years

Child Capacity: 1-2

Fall Height: 96"

Product Type: Kids Gym

Safety Zone: 12' 2" x 16' 0"
