

Meets National Standards for: ✓ ASTM F1487-17 ✓ CPSC Guidelines #325

### Product Description

The Accessible Hand Bike provides an opportunity to workout in fresh air with a great view in sight. It targets upper body muscles, especially the forearms, and shoulders, when pedaled with hands. The pedals are purpose-built to hold and rotate with hands and build grip strength and overall arm mobility in the process. But that's not all. There's a smart feature located at the top end of the Accessible Hand Bike's bar. This is a friction adjustment knob which can be turned to control the resistance level of the pedals. Friction adjustment makes the hand bike inclusive for all ages with different levels of strength. The metal post of the Accessible Hand Bike is built to last. It is made from commercial-grade steel that can support a heavy load and withstand harsh elements of the weather for a long period. The structure will stay new and rust-free be it rain or shine. The hand pedals are also sturdy so rest assured the mischievous ones won't be able to damage it.

### Product Specifications

**Price:** \$1,162.<sup>00</sup>

**Model Number:** PAF003

**Age Range:** 13 years +

**Unit Size:** 2' 10" x 1' 3"
