

Meets National Standards for: ✓ ASTM F1487-17 ✓ CPSC Guidelines #325

### Product Description

The Accessible Lat Pull-Down Machine for Outdoor Gyms can be a much-needed addition to your outdoor fitness setup. It lets users work on their lats which are those essential back muscles we rely on every day. The machine is built with inclusivity in mind. One side of the machine is designed without seating, so it's easily accessible for those using wheelchairs. The other side has a built-in seat, so two people can exercise side-by-side while sharing workout tips with one another. Users need to make sure they're sitting up straight and engaging their core, whether they're on the built-in seat or their wheelchair. Regular exercise on the Accessible Lat Pull-Down Machine for Outdoor Gyms naturally enhances oxygen flow, which can lead to better workouts and sharper focus. And working out in the fresh air is proven to boost energy and improve mood. So the benefits are multidimensional. The entire structure is made from high-quality steel engineered to stand up to weather and frequent use. The plastic components are also quite durable.

### Product Specifications

**Price:** \$2,326.<sup>00</sup>

**Model Number:** PAF004

**Age Range:** 13 years +

**Unit Size:** 5' 3" x 2' 11"
