

Meets National Standards for: ✓ ASTM F1487-17 ✓ CPSC Guidelines #325

### Product Description

The Assisted Step Up Platforms help individuals of all ages and ability levels improve their strength and mobility. The structure features a set of five galvanized steel platforms of varying heights and guardrails on the sides that follow this height. The step heights are low enough to be reachable to people with mobility issues but varied enough to provide progress with regular use. For support, users can hold the railings while stepping on higher or lower steps. What's even better about these handrails is that they feature a textured hand grip for added support. The steps and the railings are made from galvanized steel which is known for its long-lasting lifespan. The steps have perforations that provide the necessary traction for safe walking. Since people with mobility issues have a higher risk of falling, this slip-resistant design helps a great deal. The painted surfaces of the Assisted Step Up Platforms have rust-resistant coating which further extends the lifespan of the structure.

### Product Specifications

**Price:** \$5,478.<sup>00</sup>

**Model Number:** PAS004

**Age Range:** 13 years +

**Unit Size:** 9' 1" x 3' 4"
