

Product Description

There's nothing quite like the competitive spirit that comes when doing chest presses back to back with a friend, partner or colleague. The cleverly designed Royal Double Station Chest Press adapts to each user to provide a customized workout experience as it uses a person's body weight to complete the press. It has been created as a universal chest press suitable for teenagers and adults, for both male and female, as the height of the bars and grips is right in front of the user when seated. There is an instruction board which provides key information on how to operate the Royal Double Station Chest Press correctly to get the most benefit out of the workout in all weathers. It's perfect for those wishing to build up their pectoral, chest, arm and upper back muscles from a seated position. Whether this is placed in a public setting for community use or in a high school, it's guaranteed to be one of the most in demand sets of outdoor gym equipment.
