

### Product Description

This Diamond Pattern Rolled Edge Bench with Back is an excellent way to provide a safe and secure seat whether it's used in an educational facility or public area such as a park or town. It has a rolled edge which makes it easy to sit down on and stand up from, and when people are seated their legs are cushioned by the contoured edge. The diamond pattern offers a stylish look but it also serves the purpose of allowing water to fall straight through it when it rains. The 4ft standard bench is perfect for placing beside a trail or park, and the larger 6ft bench can be used in areas where there's a lot of foot traffic with people looking to take a load off. The Diamond Pattern Rolled Edge Bench with Back comes with your choice of Standard or Extreme thermoplastic coating which repels water and protects the steel underneath from corrosion. The best part is you can choose from 13 color options to match any aesthetic you're aiming to create. Install directly onto concrete or choose a portable option.
