

Product Description

When you need an outdoor bench that's going to be able to withstand the elements year after year and consistent use, then the Diamond Pattern Contoured Bench with Arms is a top choice. It is made from steel that's been coated in a thermoplastic layer to protect it from rain and UV rays as well as scratches and scuffs from frequent use. Choose from a standard 4ft bench 2-3 people, or opt for the 6ft version which can comfortably sit 4-5 people. The Diamond Pattern Contoured Bench with Arms can be installed two ways, either by concreting it directly in-ground or by using the metal plate to bolt it down securely onto asphalt or concrete. The diamond pattern allows great airflow around the users, and it won't stay wet for long after a rain shower thanks to the porous design. This bench features a contoured back and seat so it's much more comfortable to sit on by children and adults of all ages. Available in a choice of 13 colors.
