

Downtown Bench without Back

\$1,528.⁰⁰

Product Description

The clean, modern-looking Downtown Bench without Back is designed to fit easily into any outdoor space. Its unique metal strap seating with a slight dip in the center creates a visually appealing striped pattern. The dip also makes the Downtown Bench naturally more ergonomic for users. The absence of backrests shouldn't be seen in a negative light because this design supports more sitting positions and placement options. People can sit and face in either direction, and the bench can be placed either along a wall or in the middle of a square. Comfortable and sturdy armrests are there on either side to support your arm or weight if you want to lean on it. The Downtown Bench is available in two sizes, 4-foot and 6-foot, making it suitable for environments with varying traffic. It also comes with two coating options: the Standard Finish is reliable for protection against daily wear and tear, while the Extreme Finish takes durability up a notch by providing protection against harsher outdoor conditions.
