

Product Description

Looking for a bench that's as much a conversation starter as it is a comfortable spot to sit? The Diamond Pattern MOD Bench with Back can be counted on. While the bench totally nails the looks, there's also a unique feature. The armrests are there to do double duty. While they provide a comfy place to rest your arms, they are also the support posts of the bench. No matter if it's a couple of kids or a group of adults lounging on it, the bench can handle the load with ease. The seat and the back section are one piece of metal with a curve in between that contours perfectly to your body's shape. And the diamond-patterned nets serve more than just good looks. They're good for airflow when the weather heats up, as well as instant water drainage to keep rust and moisture buildup at bay. The Diamond Pattern MOD Bench offers both in-ground and surface mounting options, both ensuring it doesn't go anywhere!
