

Rectangular Portable Picnic Table with Perforated Steel

\$1,220.⁰⁰

Product Description

Whether used in a public park for a clean place to sit and enjoy picnics or in an outdoor cafeteria, the Rectangular Portable Picnic Table with Perforated Steel is a great addition. It comes in multiple lengths including 4ft, 6ft and 8ft, but the 8ft version can also be designed with either a single or double overhang on the end of the table to make it wheelchair accessible. If you need an extra long table capable of seating lots of people, there's even the option to have a 10ft table which is made with two 5ft sections securely bolted together. The Rectangular Portable Picnic Table with Perforated Steel is easy to move around if you need to change the layout and the perforated surface makes the table light but also allows rain to drain through it. It is covered in a thermoplastic coating so that it is highly resistant to rust and corrosion. Ideal for small groups to eat together whether in a public or private setting.
