

Rectangular Independent Pedestal Picnic Table with Diamond Pattern

\$1,500.⁰⁰

Product Description

If you're looking to create a fixed table and bench structure for an outdoor space, the Rectangular Independent Pedestal Picnic Table with Diamond Pattern is a top option in 6ft or 8ft sizes. You can even add an overhang at the end for wheelchair users. It can be fastened to existing concrete floors with a metal plate, or you can choose the option of concreting it in yourself at the desired height. The table is created with strong steel supports so it can withstand all weather conditions including strong winds, as well as multiple children or adults using it at the same time for socializing or eating. When you need a durable finish, you can opt from the Standard or Extreme thermoplastic coating. This specialized material is soft to the touch as opposed to bare metal, has a texture that can easily grip any plates, cups or books to prevent them from sliding, and it is also resistant to water. Coupled with the diamond pattern, this makes the table able to be outside in the worst wet weather as the rain simply rolls off the surface and falls through.
