

## Rectangular Independent Pedestal Picnic Table with Perforated Steel

**\$1,891.<sup>00</sup>**

### Product Description

This Rectangular Independent Pedestal Picnic Table with Perforated Steel has a surface made up of lots of small circular holes so that rainwater can drip straight through instead of sitting on the surface. This means that even though it has just rained, kids and adults can sit down without getting wet. The structure can be installed in one of two ways. You can order it with plates that are fastened onto a smooth and level concrete surface, or you can choose to have it installed in the ground to your desired height. You can choose the size you want too, with a 6ft table seating approximately eight people and an 8ft table giving room for up to ten people. This makes it ideal for outdoor spaces where people want to enjoy a family or neighborhood BBQ, celebrate a special occasion, or seat multiple children to teach them in an outdoor setting. Select from lots of colors to suit your requirements, with a Standard or Extreme coating.
