

Octagon Rolled Edge Single Pedestal Picnic Table with Perforated Steel

\$2,543.⁰⁰

Product Description

This Octagon Rolled Edge Single Pedestal Picnic Table with Perforated Steel allows easy access to the benches from all sides, and the single pedestal in the middle provides a solid foundation whether it's cemented in-ground or fixed with a metal plate and bolted into concrete. The choices for customization on this picnic table are outstanding. You can choose from two kinds of finish to cover the table with a thermoplastic coating so it's protected from fading in UV light and rain water can't settle on it, supported by the round perforated holes for efficient drainage. Select from more than a dozen colors to brighten up your play area too. As the Octagon Rolled Edge Single Pedestal Picnic Table with Perforated Steel has rounded seat edges, it makes it much more comfortable for long periods of use whether the picnic table is being used as somewhere to eat for an hour-long lunch break or when conducting an outdoor lesson.
