

Rectangular Nexus Pedestal Table with Diamond Pattern

\$1,772.⁰⁰

Product Description

The Rectangular Nexus Pedestal Table with Diamond Pattern comfortably seats a crowd without anyone feeling cramped. If you've got space in your setup, this table has got you covered. A great feature is that the seating is divided into four separate benches on either side instead of one long continuous bench where everyone has to stand up just to let one person out. The four-bench setup with a gap between them also means more than one group of people can dine at the table at the same time. The diamond-pattern netting helps keep things cool and dry by allowing air to circulate freely through the surface. And if it rains, water won't pool up, leaving you with a soggy mess. Running along the entire underside are reinforced horizontal beams that do the heavy lifting (literally!). And to ensure rock-solid stability with no wobbly moments, the legs can be firmly bolted to the ground. If bolting isn't suitable for the type of ground you have, you can fix the legs inside the ground with the in-ground mount.
