

Product Description

Looking for a picnic/patio table with a versatile design and portable base? The Diamond Pattern Round Patio Table is ideal for any type of socialization event. It encourages closeness among guests and allows for easy relocation as per visitors' requests. As it is made of high-grade steel, this table combines durability with a unique style. The perforated design of this table prevents the accumulation of water on the surface of the table in case of rain showers. Also, the Diamond Pattern Round Patio Table is heat-resistant, which means it will stay cool to the touch during hot summer days. A center hole makes sure that guests can hang their umbrellas and sit in the shade. You can also select from various colors available to match it with the overall theme of your outdoor area. Since the table doesn't have any attached seats, you can pair it with any chairs that suit your style.
